NEVADA VITAL STATISTICS REPORT

1985

Authorized by:

Jerry Griepentrog, Director
Department of Human Resources

Lawrence P. Matheis, Administrator
Nevada State Health Division

William C. Moell, Manager
Section of Vital Statistics

Compiled and Edited by:

Olga Larson, Field Representative
Section of Vital Statistics

Special Thanks to:

Kelly G. MacKellar, Vital Records Specialist II
Office of Vital Records

Jean I. Gunter, Vital Records Specialist III
Quality Control Section, Vital Statistics

March 1987

STATE OF NEVADA
DEPARTMENT OF HUMAN RESOURCES
HEALTH DIVISION
505 East King Street
Carson City, Nevada 89710

RICHARD H. BRYAN
Governor

JERRY GRIEPENTROG
Director

Dear Fellow Nevadans,

The 1985 Nevada Vital Statistics Report is a document that should prove a valuable resource to everyone interested in the basic facts about the vital events in our state.

As State Health Administrator, I'm proud of the professionalism and care with which William Moell, Vital Statistics Section Manager and the staff handle these sensitive functions of registering and tracking this vital information.

In future reports from the Health Division's Vital Statistics Section, these and other data will be analyzed to help all of us better understand the health of Nevadans.

Sincerely,

Larry Matheis

Introduction

This report summarizes data compiled from original birth, death, stillbirth, induced abortion, marriage, and divorce records filed with the Section of Vital Statistics as required by law. Standard forms recommended by the National Center for Health Statistics are used for all records, with the exception of marriage and divorce.

Responsibility for filing of the birth certificate lies with the hospital medical records personnel, the physician, midwife, or other attendant. Undertakers or persons acting as such are legally charged with filing death certificates and fetal death certificates. County Recorders are responsible for forwarding the original marriage certificates to the Vital Statistics office for data collections and the final mailing process to the parties of record. The County Clerk of each county is required to submit a Report of Decree of Divorce/Annulment to the Vital Statistics office for each occurrence in the preceding month. Induced abortion reports are completed and sent in directly by the physician, hospital, or clinic. The quality of data presented in the report is directly related to the completeness and accuracy of the information contained on the certificates.

Users of this publication are welcome to offer us their comments and/or suggestions. Comments or questions concerning format, content, technical aspect of the publication, or requests for additional data should be submitted to: Nevada State Health Division, Section of Vital Statistics, 505 E. King St., Rm. 102, Carson City, Nevada 89710.

The Nevada Vital Statistics System

The Nevada Section of Vital Statistics is composed of three distinct sections. 1) the Vital Records Section, 2) the Quality Control Section, and 3) the Data Entry Section. These three areas carry on a statewide system of registration, collection, and preparation of data and public services pertaining to births, deaths, adoptions, paternities, induced abortions, marriages and divorces.

All vital events are first recorded by the local registrar in each county, who in turn forwards the original record or report to the Vital Statistics office. The Quality Control Section checks the certificates for accuracy and completeness before filing the records in a fire proof vault for permanent storage.

After ninety days the certificates are then taken to the Data Entry Section where statistical data tapes are initiated. The Vital Records Specialist III is then responsible for the computer programs used to compile the data for this report. All formats and methodology used are compiled and edited by the Vital Statistics Field Representative.

DEFINITIONS AND METHODS FOR STATISTICAL RATES

ABORTION - The termination of a human pregnancy with an intention other than to produce a live birth or to remove a dead fetus. (NRS 442.240)

ABORTION RATE - Total number of abortions divided by total live births times 1000.

DIVORCE - As used in this publication, divorce includes annulment.

DIVORCE RATE - Total number of divorces divided by population times 1000.

ESTIMATED POPULATION -Population bases used in the calculation of rates were prepared by the State Office of Community Services. Estimated populations are stated as of July 1 of the year for which the estimate is made.

STILLBIRTH (Fetal Deaths) - Means a birth after at least 20 weeks of gestation in which the child shows no evidence of life after complete birth. (NRS 440.070)

IMMATURE BIRTH - A birth wherein the birth weight is equivalent to 2500 grams or less. (Approximately 5lbs. 8oz.)

IMMATURE BIRTH RATE - Total immature births divided by total births times 1000.

INFANT DEATH - The death of an infant under one year of age including neonatal deaths.

INFANT DEATH RATE - The total infant deaths divided by the total births times 1000.

LIVE BIRTH - A birth in which the child shows evidence of life after complete birth. A birth is complete when the child is entirely outside the mother, even if the cord is uncut and the placenta still attached. The words "evidence of life" include heart action, breathing, or coordinated movement of voluntary muscle. (NRS 440.030)

LIVE BIRTH RATE - The number of live births divided by the population times 1000.

MARRIAGE - Marriage is filed with the County Recorder in the county where the license was purchased.

MARRIAGE RATE - Total marriages divided by estimated population times 1000.

NEONATAL DEATH - A death occurring in the first 27 days of life.
NEONATAL DEATH RATE - The total neonatal deaths divided by the total live births times 1000.

PERINATAL DEATH - The total number of stillbirths plus the number of neonatal deaths.
PERINATAL DEATH RATE - The number of stillbirths plus the neonatal deaths divided by the number of live births plus stillbirths times 1000.

DEATH - A person who has sustained irreversible cessation of all functioning of the brain, including the brain stem, is dead.
DEATH RATE - The total number of deaths divided by the estimated population times 1000.

CAUSE OF DEATH - Deaths, by cause, are classified according to the International Classification of Disease, Ninth Edition, adapted for use in the United States.
DEATH RATE FROM SPECIFIC CAUSE - The number of deaths from a specific cause divided by the total estimated population times 1000 or 100,000 - whatever the case may be.

SIDS - Deaths due to Sudden Infant Death Syndrome.
SIDS RATE - The total number of deaths due to Sudden Infant Death Syndrome divided by the total live births times 1000.

RESIDENT DATA - Data allocated by place of residence of the decedent, or by place of residence of the child's mother (deaths, births).

OCCURRENCE DATA - Data allocated by place where event actually occurred.

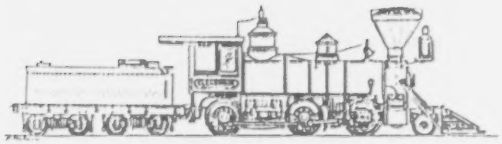
VITAL
STATISTICS
SUMMARY
1985



ONCE UPON A TIME.....

Probably no other railroad in the United States has captured the imagination of people who love old steam trains than the legendary Virginia & Truckee. Destined to be the richest and most famous short line in all the gaudy annals of nineteenth century railroading, the V&T was established to ferry the ores of the fabulous Comstock Lode down to the Carson River.

On the morning of September 28, 1869, a few Carson citizens gathered within a stone's throw of the U.S. Branch Mint for the traditional first spike to be driven at seven o'clock. But when the editor of the Carson City Daily Appeal appeared for the ceremony, he found a dozen rail lengths already spiked to the waiting ties. Henry M. Yerington and his track gangs, on hand since dawn, were unwilling to let the great enterprise wait another hour and jumped the gun. The V&T started its run into history not on schedule, but ahead of it!

From the very start, the Virginia & Truckee was a veritable success. With the discovery of the fabulous silver lode in 1873, the "Big Bonanza", brought about such lively activity that it surpassed even the wildest dreams imaginable. As production declined after 1880, traffic and income of the V&T followed suit. A cure wasn't found until shortly after 1900 when the discovery of rich ores at Tonopah yielded an increase in rail traffic. Bolstered by rising revenues, the V&T extended their tracks south in 1906 from Carson City to the rich agricultural region of Carson Valley. Starting in 1924, truck competition along a paved parallel road, coupled with the closing of the gypsum plant near Mound house, affected the V&T so dramatically that it never fully recovered.

The 1979 Legislative session saw the creation of a Dept. of Museums and History whereby various state-operated museums and the historical society were consolidated. Additionally, the lawmakers created the Virginia & Truckee Railroad Museum, encompassing all of the state-owned railroad equipment, and transferred the storage building and its treasures to the Nevada State Museum. During the winter of 1979, the interior of the storage facility was adapted for public use and furnished with exhibits designed to provide visitors with a brief background of the V&T.

May 31, 1980, the 30th anniversary of the V&T's last run, was chosen as opening day of the Railroad Museum. Over 1,000 people attended the ceremonies, highlighted by the keynote address delivered by then Governor Robert List. It was open only on Saturdays, Sundays, and holidays (with only rudimentary facilities and a collection virtually unrestored), yet nearly 6,000 people dropped in during the year to view the restoration of engine No. 25 by Short Line Enterprises. The V&T Museum concluded its initial season on Nevada Day weekend with a resounding and noisy finish when 2,000 people came to see No. 25 operate again. Not since 1950 had residents of Nevada's capital heard the sound of a V&T steam whistle.

The Museum has become a mecca for the faithful followers of the ol' road. For thirty years they patiently waited for a place to house and preserve its treasured remnants and now, the future is unlimited as the Virginia & Truckee Railroad Museum offers an unparalleled journey into the past.

Art and Other Credits

Our thanks to Mr. Richard Datin of the Nevada State Museum for the contributions of several of his personal Pen & Ink drawings, and for allowing us to use excerpts from the 1985 V&T Railroad and Park publication.

VIRGINIA & TRUCKEE RAILROAD.

CARSON & COLORADO RAILROAD.

TARIFF No. 3.

Thirty-day Round-trip Ticket Rates.

IN EFFECT MAY 1, 1869.

TO AGENTS.—Copies of this Tariff must be posted in two public and conspicuous places in every depot, where same shall be accessible to the public and can be conveniently inspected.

Agents will sell tickets at these rates on the understanding with the passenger that the ticket is void after date punched in margin thereof, which is thirty (30) days from date of purchase, as per contract on ticket, which passenger must sign, Agent to witness signature.

D. A. BENDER,
Gen. Frt. and Passenger Agt.

H. M. YERINGTON,
General Superintendent.

RICHARD H. BRYAN
Governor

NEVADA STATE HEALTH DIVISION
SECTION OF VITAL STATISTICS

NEVADA VITAL STATISTICS REPORT
1986

Authorized by:
Jerry Griepentrog, Director
Department of Human Resources

Lawrence P. Matheis, Administrator
Nevada State Health Division

William C. Moell, Manager
Section of Vital Statistics

Compiled and Edited by:
Olga Larson, Field Representative
Section of Vital Statistics

Special Thanks to:
Kelly G. MacKellar, Vital Records Specialist II
Office of Vital Records

Jean I. Gunter, Vital Records Specialist II
Quality Control Section, Vital Statistics

May 1988

STATE OF NEVADA
DEPARTMENT OF HUMAN RESOURCES
HEALTH DIVISION
505 East King Street
Carson City, Nevada 89710

RICHARD H. BRYAN
Governor

JERRY GRIEPENTROG
Director

Dear Fellow Nevadans,

The 1986 Nevada Vital Statistics Report is a document that should prove a valuable resource to everyone interested in the basic facts about the vital events in our state.

As State Health Administrator, I'm proud of the professionalism and care with which William Moell, Vital Statistics Section Manager and the staff handle these sensitive functions of registering and tracking this vital information.

In future reports from the Health Division's Vital Statistics Section, these and other data will be analyzed to help all of us better understand the health of Nevadans.

Sincerely,

Larry Matheis

ART CREDIT

Afton Frederick
PO Box 220
Dayton, NV 89403

Special thanks to Afton Frederick for allowing the use of her pen and pencil drawings. Afton is a longtime resident of Dayton, Nevada. She is a member of the Nevada Art Association and has won many ribbons in shows throughout Nevada. The drawings are of the Dayton, Virginia City and Carson City areas.

Some interesting notes; the drawing of the State Capitol of 1871 shows a "Bids on a New Fence" sign. This bid was awarded to a local lady, Hannah K. Clapp, a school teacher. The fence is presently surrounding the capitol grounds.

The Dayton church drawing is of a church originally built in Gold Hill, Nevada and moved to Dayton by rolling it along on logs! The Grammar School was built in Dayton in 1865 and is presently being used as a Senior Citizens Center.

Introduction

This report summarizes data compiled from original birth, death, stillbirth, induced abortion, marriage, and divorce records filed with the Section of Vital Statistics as required by law. Standard forms recommended by the National Center for Health Statistics are used for all records, with the exception of marriage and divorce.

Responsibility for filing of the birth certificate lies with the hospital medical records personnel, the physician, midwife, or other attendant. Undertakers or persons acting as such are legally charged with filing death certificates and fetal death certificates. County Recorders are responsible for forwarding the original marriage certificates to the Vital Statistics office for data collections and the final mailing process to the parties of record. The County Clerk of each county is required to submit a Report of Decree of Divorce/Annulment to the Vital Statistics office for each occurrence in the preceding month. Induced abortion reports are completed and sent in directly by the physician, hospital, or clinic. The quality of data presented in the report is directly related to the completeness and accuracy of the information contained on the certificates.

Users of this publication are welcome to offer us their comments and/or suggestions. Comments or questions concerning format, content, technical aspect of the publication, or requests for additional data should be submitted to: Nevada State Health Division, Section of Vital Statistics, 505 E. King St., Rm. 102, Carson City, Nevada 89710.

The Nevada Vital Statistics System

The Nevada Section of Vital Statistics is composed of three distinct sections. 1) the Vital Records Section, 2) the Quality Control Section, and 3) the Data Entry Section. These three areas carry on a statewide system of registration, collection, and preparation of data and public services pertaining to births, deaths, adoptions, paternities, induced abortions, marriages and divorces.

All vital events are first recorded by the local registrar in each county, who in turn forwards the original record or report to the Vital Statistics office. The Quality Control Section checks the certificates for accuracy and completeness before filing the records in a fire proof vault for permanent storage.

After ninety days the certificates are then taken to the Data Entry Section where statistical data tapes are initiated. The Vital Records Specialist III is then responsible for the computer programs used to compile the data for this report. All formats and methodology used are compiled and edited by the Vital Statistics Field Representative.

DEFINITIONS AND METHODS FOR STATISTICAL RATES

ABORTION - The termination of a human pregnancy with an intention other than to produce a live birth or to remove a dead fetus. (NRS 442.240)

ABORTION RATE - Total number of abortions divided by total live births times 1000.

DIVORCE - As used in this publication, divorce includes annulment.

DIVORCE RATE - Total number of divorces divided by population times 1000.

ESTIMATED POPULATION - Population bases used in the calculation of rates were prepared by the State Office of Community Services. Estimated populations are stated as of July 1 of the year for which the estimate is made.

STILLBIRTH (Fetal Deaths) - Means a birth after at least 20 weeks of gestation in which the child shows no evidence of life after complete birth. (NRS 440.070)

IMMATURE BIRTH - A birth wherein the birth weight is equivalent to 2500 grams or less. (Approximately 5lbs. 8oz.)

IMMATURE BIRTH RATE - Total immature births divided by total births times 1000.

INFANT DEATH - The death of an infant under one year of age including neonatal deaths.

INFANT DEATH RATE - The total infant deaths divided by the total births times 1000.

LIVE BIRTH - A birth in which the child shows evidence of life after complete birth. A birth is complete when the child is entirely outside the mother, even if the cord is uncut and the placenta still attached. The words "evidence of life" include heart action, breathing, or coordinated movement of voluntary muscle. (NRS 440.030)

LIVE BIRTH RATE - The number of live births divided by the population times 1000.

MARRIAGE - Marriage is filed with the County Recorder in the county where the license was purchased.

MARRIAGE RATE - Total marriages divided by estimated population times 1000.

NEONATAL DEATH - A death occurring in the first 27 days of life.
NEONATAL DEATH RATE - The total neonatal deaths divided by the total live births times 1000.

PERINATAL DEATH - The total number of stillbirths plus the number of neonatal deaths.
PERINATAL DEATH RATE - The total number of stillbirths plus the neonatal deaths divided by the number of live births plus stillbirths times 1000.

DEATH - A person who has sustained irreversible cessation of all functioning of the brain, including the brain stem, is dead.
DEATH RATE - The total number of deaths divided by the estimated population times 1000.

CAUSE OF DEATH - Deaths, by cause, are classified according to the International Classification of Disease, Ninth Edition, adapted for use in the United States.
DEATH RATE FROM SPECIFIC CAUSE - The number of deaths from a specific cause divided by the total estimated population times 1000 or 100,000 - whatever the case may be.

SIDS - Deaths due to Sudden Infant Death Syndrome.
SIDS RATE - The total number of deaths due to Sudden Infant Death Syndrome divided by the total live births times 1000.

RESIDENT DATA - Data allocated by place of residence of the decedent, or by place of residence of the child's mother (deaths, births).

OCCURRENCE DATA - Data allocated by place where event actually occurred.
